OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the Native Hawaiian organizations most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Waianae Army Recreation Center (WARC) in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections. The MCX did not physically verify the existence of collections and, as such, the information contained in this report is based on background record reviews and information obtained via telephone interviews with the aforementioned installation personnel and institution professionals.

Archival research for WARC began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Department of Land and Natural Resources, State Historic Preservation Division, Honolulu; the Bernice Pauahi Bishop Museum, Honolulu; and the U.S. Army Corps of Engineers, Pacific Ocean Division, Fort Shafter, Hawaii. The records search was performed at the above repositories in September of 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Draft Section 6 Summary letters are enclosed (Appendix I), as well as a listing of the Native Hawaiian organizations that should be contacted and their points of contact (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT WAIANAE ARMY RECREATION CENTER

To date, five archaeological investigations have reportedly been conducted at WARC by the following groups:

Bernice P. Bishop Museum, Honolulu, Hawaii,
Cultural Surveys Hawaii, Kailua, Hawaii,
Ogden Environmental and Energy Services, Honolulu, Hawaii,
State Historic Preservation Division, Department of Land and Natural Resources,
Honolulu, Hawaii, and
U.S. Army Corps of Engineers, Pacific Ocean Division (USACE-POD), Honolulu,
Hawaii.

Investigations have consisted of systematic surveys and testing, monitoring of construction activities, and excavations to mitigate adverse effects on sites where necessary for the installation's mission. The Bernice P. Bishop Museum, Cultural Surveys Hawaii, and Ogden Environmental and Energy Services are the only organizations that performed work that included the collection of artifacts, human remains, and/or other materials.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

Approximately 27 ft³ of archaeological materials have been identified for WARC. As of the date of this report, these materials were reportedly housed at the following repositories:

| | |
|---|----------------------|
| Bernice P. Bishop Museum, Honolulu | ~8 boxes |
| Cultural Surveys Hawaii, Kailua | ~4.6 ft ³ |
| Ogden Environmental and Energy Services, Honolulu | ~14 ft ³ |

Materials include ground and chipped stone, worked bone and shell, modified coral, charcoal, floral materials and animal bone, historic glass, metal and ceramic items, as well as human skeletal remains.

The attached *Summary of Current Locations of Archaeological Collections from Waianae Army Recreation Center* (Appendix III) provides more detailed information about each collection derived as a result of archaeological investigations at the installation. Appendices V and VI

contain catalogs provided by Cultural Surveys Hawaii and Ogden Environmental and Energy Services, that provide further detail on the collections currently housed at those repositories. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

NAGPRA-Related Materials

The remains of at least 33 individuals, as well as thousands of associated funerary objects, have been recovered during archaeological activities at WARC. Burials have been identified as both prehistoric and historic. All remains have been identified as Polynesian in ancestry, excluding those too fragmentary or too young to identify.

Five of these individuals were recovered in 1984 during archaeological monitoring of construction activities. The project was initiated by the State Historic Preservation Division after human remains were uncovered by construction workers, and was completed by staff from the Bernice P. Bishop Museum. Only one burial reportedly contained associated funerary objects.

Cultural Surveys Hawaii recovered remains of at least ten individuals during archaeological excavations conducted at the installation between October 1984 and January 1985. Six burials reportedly contained associated funerary objects.

The remains of at least eighteen individuals were recovered by Ogden Environmental and Energy Services during archaeological investigations conducted at the installation between October 1988 and April 1990. Nine burials reportedly contained associated funerary objects.

Human remains recovered during the aforementioned archaeological investigations at WARC have reportedly been reinterred at the installation in cooperation with local Hawaiian organizations (telephone conversation with Chuck Streck, archaeologist, U.S. Army Corps of Engineers, Pacific Ocean Division, 24 February 1995). However, at least one fragment of human skeletal material (WARC 1540 - a human molar with root attached) is listed in the catalog of collections currently housed at Ogden Environmental and Energy Services (see Appendix VI).

Funerary objects do not appear to have been consistently reburied with all of the individuals. Associated funerary remains are listed in catalogs of collections currently housed at

Cultural Surveys Hawaii and Ogden Environmental and Energy Services (see Appendices V and VI).

It is unclear whether or not WARC collections at the Bernice P. Bishop Museum contain NAGPRA-related materials. The human remains from WARC that were once housed there have reportedly been reburied (telephone conversation with Liz Bauwens, collections manager, 13 December 1995). The MCX requested further information about the contents of the Bishop Museum's WARC collections, however, no reply was received as of the date of this report.

Appendix IV presents a detailed summary of NAGPRA-related materials from WARC using information obtained from the project reports examined by the MCX. This summary can be compared with the collections catalogs in Appendices V and VI, which note burial items and/or human remains that are currently housed at Cultural Surveys Hawaii and Ogden Environmental and Energy Services.

The final determination of sacred objects, or objects of cultural patrimony among the WARC collections may be established upon further consultation with Native Hawaiian organizations according to the definitions and restrictions specified in NAGPRA.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Appendix VII contains the list of references reviewed by the MCX during its archival research. No references were found for WARC in a search of the National Archeological Database (NADB).

CULTURAL OVERVIEW OF THE REGION

Hawaii is among some thirty-eight major archipelagos and islands referred to as Polynesia (Kirch 1984:19). Archaeological evidence suggests that the Hawaiian islands have been inhabited by humans for the past 1,600 years. The apparent area of origin of these first Hawaiian inhabitants was in central East Polynesia, probably the Marquesas Islands. Information regarding early Hawaiian society is sketchy, however, it is believed that it must have been like that of the Ancestral Polynesians, who had a chiefdom based on corporate descent groups (Eidsness 1995:8).

European contact with Native Hawaiians commenced with the arrival of British Captain James Cook in 1778. At this time, the eight islands that comprise Hawaii were under separate rule. Hawaiian society was hierarchically organized, with several grades of chiefs (*ali'i*) and land managers (*konohiki*) over a large class of commoners (*maka'ainana*). Social organization was closely tied to land use, which involved a tiered system of land divisions. Whole islands or

parts of islands constituted independent chiefdoms (*moku*) controlled by high chiefs. The *moku* were divided into a large number of wedge-shaped sections (*ahupua'a*) controlled by lesser-chiefs. Within the *ahupua'a* were smaller sections held and worked by extended households or groups of commoners (Kirch 1985:2; MacKenzie 1991:3).

Contact with the Europeans brought significant changes in both the Hawaiian land tenure system and Hawaiian social structure. In 1795, King Kamehameha I brought all of the islands, with the exception of Kauai, under his control. Although Kamehameha did not make substantial alterations in land tenure, his rule provided a new administrative level for the islands. Kamehameha also initiated relationships with Europeans and Americans which intensified throughout the nineteenth century (MacKenzie 1991:5).

The Constitution of 1840, which established a governmental structure for the kingdom and formally declared that the land belonged to the chiefs and people, with the king as trustee for all, attempted to deal with conflicts over land that began to arise between Hawaiians and foreigners. The demand for change in the land tenure system resulted in the Great Mahele of 1848, which divided the kingdom into thirds: one-third to the Hawaiian government, one-third to the chiefs, and one-third to the commoners who worked the land. In 1850, legislation was passed which allowed Westerners to own and convey land (MacKenzie 1991:5-9).

By the late nineteenth century, Westerners owned large plantations on most of the islands and had gained significant economic and political power in the kingdom. The struggle to control land in the islands eventually resulted in the overthrow of the Hawaiian monarchy in 1893, when the U.S. minister to Hawaii, John Stevens, ordered U.S. naval forces to land in Hawaii in support of white settlers. The provisional government, and later the Republic of Hawaii, designated the Crown and government lands as its public lands. When the United States annexed the Republic of Hawaii in 1898, the revolutionary government ceded these public lands to the federal government (Parker 1989:135). When Hawaii was admitted to the Union as a state in 1959 the federal government relinquished title of the former Crown and Government lands to the state, although certain lands set aside through an act of congress, executive order, presidential proclamation, or gubernatorial proclamation remained the property of the United States. Congress passed legislation allowing these "retained" lands to be returned to the state when they are declared unnecessary to federal needs (MacKenzie 1991:18).

Waianae Army Recreation Center is located along the shoreline of Pokai Bay on the west, or leeward, coast of Oahu. According to a map prepared by the Hawaiian Studies Institute (1987), the installation appears to fall within the boundaries of the pre-Mahele Waianae District (or *moku*), and within the Waianae *ahupua'a*, which was originally called Waianae-Kai (Hammatt *et al.* 1985:21).

The Waianae District in general is believed to have been an important area in Hawaiian prehistory due to its abundant marine resources and based on the traditional accounts relating to the area. Waianae is a focus of a number of Native Hawaiian myths, and in the late eighteenth

century a school was reportedly founded at Pokai Bay to preserve the folklore of the island and instruct young men and women of Oahu in the history, astronomy, navigation, and genealogies of the island (Hammatt *et al.* 1985:17-23).

The earliest historical account of the region notes that the only village spotted along the leeward shoreline of Oahu was at Waianae. In the early nineteenth century, Waianae became involved in the sandalwood trade, Hawaii's first profitable export; missionary schools were also founded in the vicinity at this time. By 1835, the Waianae population had declined significantly, facilitating the passage of large tracts of land into the hands of a few landholders. During the Great Mahele, Waianae Ahupua'a became Crown lands (Hammatt *et al.* 1985:23-27).

Ranching became the leading industry along the Waianae Coast between 1850 and 1880, but it was the establishment of Waianae Plantation in 1878 which brought about a major change in the economy and community of Waianae. The success of the plantation resulted in a sugar boom on the Waianae Coast that reversed the earlier population decline. By 1884, Waianae was reportedly the largest settlement on Oahu outside of Honolulu (Hammatt *et al.* 1985:29). The Waianae vicinity was heavily used for military training activities during World War II, and WARC was established as a beach vacation camp for soldiers during that time (Evinger 1995:77; Hammatt *et al.* 1985: 32).

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Hawaiian organizations regarding archaeological collections from the installation. Enclosed are draft NAGPRA Section 6 Summary letters (Appendix I) and a list of points of contact at three Native Hawaiian organizations (Appendix II).

Two state-wide organizations are identified in NAGPRA (Sections 2.6 and 2.12) and must be contacted: the Office of Hawaiian Affairs, which was established by the constitution of the state of Hawaii; and Hui Malama I Na Kupuna O Hawai'i Nei, the non-profit, Native Hawaiian organization incorporated by the state to provide guidance and expertise in decisions dealing with Native Hawaiian cultural issues, particularly burial issues. Additionally, the Departmental Consulting Archeologist of the National Park Service recommends contacting the relevant island burial council (National Park Service 1993).

Although only the above mentioned organizations are identified in Appendix II, there may be other Native Hawaiian organizations or individuals that particular installations should contact regarding NAGPRA issues. The statutory definition (Section 2.11) should be used to identify any other Native Hawaiian organizations:

“Native Hawaiian organization” means any organization which:

- (A) serves and represents the interests of Native Hawaiians;
- (B) has as a primary and stated purpose the provision of services to Native Hawaiians,
and
- (C) has expertise in Native Hawaiian Affairs.

Additionally, the term “Native Hawaiian” is defined as “any individual who is a descendant of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawaii” (Section 2.10).

Refer to 43 CRF Part 10 for the implementing regulations for NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTERS

[Installation Header]

Mr. Kunani Nihipali, President
Hui Malama I Na Kupuna O Hawai'i Nei
P.O. Box 190
Haleiwa, HI 96712-0190

Dear Mr. Nihipali:

I am writing to inform you of collections held by Waianae Army Recreation Center (WARC) that may contain Native Hawaiian cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA). Waianae Army Recreation Center has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Waianae Army Recreation Center is responsible for approximately 27 ft³ of archaeological collections reportedly housed at three repositories in Hawaii. These materials were recovered during archaeological investigations conducted at the installation between 1984 and 1990. Materials include ground and chipped stone, worked bone and shell, modified coral, charcoal, floral and faunal materials, and historic glass, metal and ceramic items.

Remains of at least 33 individuals have been discovered during archaeological investigations at WARC. Information gathered during the process of compiling the Section 6 Summary indicates that human remains encountered during archaeological investigations at WARC have been reinterred on the installation. However, documentation indicates that at least one fragment of human skeletal material (a human molar) remains in the installation's collections at one repository. Additionally, two repositories were identified as housing burial-associated materials which were not reinterred with the individuals with that they were associated.

In accordance with Sections 6 and 2.11 of the statute, we are inviting you to consult with us regarding these archaeological collections. We are also notifying the Office of Hawaiian Affairs and the Oahu Burial Committee. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

By means of this letter, we are also initiating consultation regarding the Section 5 Inventory. The U.S. Army would like to schedule Section 5 inventory investigations of human remains and associated funerary objects at a date yet to be determined, tentatively in 1997. If Hui Malama I Na Kupuna O Hawai'i Nei wishes to comment on, or participate in, the Section 5 Inventory, please respond as soon as possible.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Waianae Army Recreation Center and Hui Malama I Na Kupuna O Hawaii Nei on these matters, please forward the name and method of contacting your organizational representative or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM WAIANAE ARMY RECREATION CENTER

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

| | |
|----------------------|---|
| REPOSITORY: | The current location in which the collection is stored, as of the date of this report. |
| REPOSITORY POC: | The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed. |
| TELEPHONE: | The telephone number for the repository POC. |
| COLLECTION ID: | The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository. |
| SITE NUMBERS: | The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field. |
| FIELDWORK DATES: | The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly. |
| EXCAVATOR/COLLECTOR: | The individual and/or organization that conducted the investigation. |

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

Summary of Current Location of Archaeological Collecti

As of March 1996

| Repository | Repository POC | Telephone | Collection ID | Site Numbers | Fieldwork Dates | Excava |
|---|-----------------|----------------|-------------------|---------------|-----------------|-----------------------------------|
| Bernice Pauahi Bishop Museum, Honolulu, HI | Toni Han | (808) 848-4117 | TL1984.217 | 50-80-05-3998 | 1984 | Bernice I Bishop M Honolulu |
| Cultural Surveys Hawaii, Kailua, HI | John Winieski | (808) 262-9972 | AR #1-769, C1-C26 | 50-80-05-3998 | 1985 | Cultural S Hawaii, I |
| Ogden Environmental & Energy Services, Honolulu, HI | Allan J. Schitz | (808) 545-2462 | WARC 1-1740 | 50-80-05-3998 | 1988 - 1990 | Ogden E & Energy Honolulu |

As of March 1996

| | Fieldwork Dates | Excavator/Collector | Collection Size | Description of Materials | Antiquity/Archaeological Period | Cultural Affiliation | Basis Determin |
|--|-----------------|---|-------------------------|--|-------------------------------------|----------------------|----------------|
| | 1984 | Bernice Pauahi Bishop Museum, Honolulu, HI | ~ 8 cu. ft. (8 boxes) | Midden Materials, (Shell, Animal Bone, Organics); "Traditional" Artifacts (Lithics, Groundstone, Shell Fishhook); <u>Historic Items</u> | Post-Contact & Possible Pre-Contact | | |
| | 1985 | Cultural Surveys Hawaii, Kailua, HI | ~ 4.6 cu. ft. (3 boxes) | Midden Samples, Charcoal, "Indigenous"; & Historic Artifacts | Pre-Contact & Post-Contact | | |
| | 1988 - 1990 | Ogden Environmental & Energy Services, Honolulu, HI | ~ 14 cu. ft. (14 boxes) | Ground & Chipped Stone; Worked Shell Bone & Coral; Charcoal, Flora & Fauna; Historic Glass, Metal & Ceramic Items; Human Tooth & Possible Human Bone | Pre-Contact & Post-Contact | | |

| Antiquity/Archaeological Period | Cultural Affiliation | Basis of Determination | Section 5 Materials |

| Pre-Contact & Post-Contact | | | N |
| Pre-Contact & Post-Contact | | | Y |

APPENDIX IV

NAGPRA-RELATED MATERIALS FROM WAIANAE ARMY RECREATION CENTER

| Project | Investigating Organization | # of Indiv. | Cultural Affiliation | Associated Materials | Status |
|---|---|-------------|--|--|--|
| Archaeological monitoring of construction activities at WARC, 1984 | State Historic Preservation Division/Bernice P. Bishop Museum | 5 | 3 identified as Polynesian; 2 unidentifiable | Burial 4: bone buttons (13) | Human remains: reportedly reinterred at WARC Associations: unknown |
| Archaeological excavations at WARC, 1984-85 | Cultural Surveys Hawaii | 10 | Prehistoric Polynesian | Burial 1: volcanic glass, basalt flakes, shell bead (1), basalt cobble (1), charcoal sample Burial D-1: shell gourd stopper (1), midden materials Burial D-2: basalt cobbles, crab claws Burial D-3: volcanic glass flakes (3), charcoal samples Burial D-4: shark's tooth (1), crab claws, volcanic glass flake (1) Burial D-5: pearl shell fishhook (1), coral file (1), volcanic glass flakes (2), crab claw (1), charcoal sample | Human remains: reportedly reinterred at WARC Associations: ~12 reportedly housed at Cultural Surveys Hawaii; remainder reinterred with human remains? |
| Intensive survey, data recovery, construction monitoring, and sampling at WARC, 1988-90 | Ogden Environmental & Energy Services | 18 | 12 Prehistoric Polynesian; 6 Historic Polynesian | Burial 1: basalt adze (1) Burial 2: coffin materials (nail fragments and coffin wood), ear ornament (1), basalt stone (1), buttons (11), decaying fabric Burial 3: coffin & coffin materials, various beads (~4152), bone comb frags., various buttons (~25), shoe frags., small mirror (1), glass vial (1), Catholic medal (1) Burial 3 or 6: beads (7), nail & nail frags. (40) Burial 4: buttons (2), bone discs (6), nail fragments (3), glass ornament (1), beads (9), abraders (3) Burial 5: coffin nails/nail frags. (44), Catholic rosary (1), beads (30), various buttons (29), button frags. (6) Burial 6: crucifix (1), bone disc (1), buttons (3), pearl shell fishhook tab (1), coffin materials (~59 nails/nail frags.) Burial 11 & 11A: dog, fish & pig bones, beads (56) Burial 14 & 14A: coral abrader (1) Burial 15: hammerstone (1), basalt slab (1), boar's tooth frag. (1) | Human remains: reportedly reinterred at WARC Associations: reportedly housed at Ogden Environmental & Energy Services |

APPENDIX VI

WARC COLLECTIONS CATALOG OGDEN ENVIRONMENTAL & ENERGY SERVICES

The following catalogs were provided by Allan Schilz, senior archaeologist for Ogden Environmental & Energy Services. They provide additional details on the archaeological collections from Waianae Army Recreation Center that are reportedly housed at Ogden's Honolulu office.

APPENDIX VII

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

| FIELD | DATA ENTERED |
|-------------------|---|
| Subject Property | Army Installation name |
| Last Name | Primary author's last name |
| First Name | Primary author's first name |
| Middle Initial | Primary author's middle initial |
| Secondary Authors | Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here |
| Title | Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title. |
| Series | If the report is part of a publication series, the name and number are provided here. |
| Date | Date of publication or submission |
| Length | Report length in pages |
| Contract Number | Contract number and delivery order number, if applicable |

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

| | |
|-------------------|---|
| Sponsoring Agency | Agency for which the report was prepared |
| Contractor | The agent contracted to perform the work |
| Subcontractor | The agent subcontracted to perform the work |

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
